

# In the Past 12 Months...

## 987

life decisions have been made by abortion-minded/abortion-vulnerable women! In 2020, there were **807 babies saved**, so FCWS has increased babies saved this year by **180 babies!**

## 950

FCWS performed 950 ultrasounds on unique, unduplicated clients. The ultrasound still proves true to increase the likelihood of a life decision!

Because of FCWS's targeted client marketing to the abortion-minded woman, we have seen a

## 200%

increase in the number of abortion-minded clients who have come into our centers in the past 12 months. Because of this increase of abortion-determined clients, it is important to really be in prayer for the clients and those ministering to the clients.

## 85%

of all positive pregnancy test clients were at-risk for abortion.

## 72%

of these abortion-minded/vulnerable women chose life.

## 1,792

FCWS had 1,792 spiritual discussions with clients, resulting in...

## 58

new faith decisions for Christ!

# ULTRASOUND SERVICES IMPACT

(National Averages from Care Net)

↑18%

In 2020, among abortion-minded clients, there was an 18 percentage-point increase in life decisions when receiving an ultrasound.

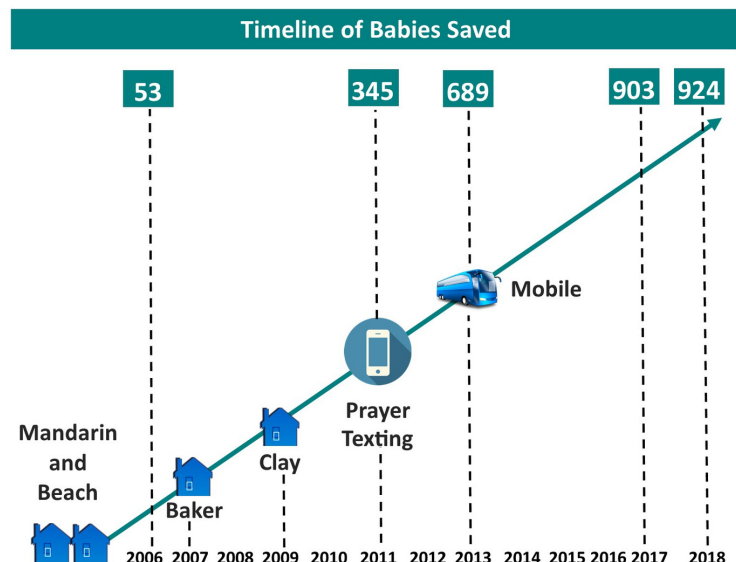

86%

For at-risk clients who received an ultrasound when the father of the baby was present, clients chose life 86% of the time, which demonstrates the profound influence of both an ultrasound with significant relational support. [3]

## Prayer Texting Outcomes:

↑1,600

FCWS has over 1,600 people registered for our pray text intercessor group.

After one year of Prayer Texting the Babies saved went up 30% and after two years it went up 100% from when we started the prayer texting. This was with no other factors being at play, for example, during this period of time no new centers were opened. The only thing different was the addition of the prayer texting.

# Current Climate of Abortion in Our Area & FCWS Response:

---

For the entire state of Florida in 2020, **75% of all abortions were completed at six weeks or less** [1], too soon to see much on an ultrasound. Additionally, **56% of Florida abortions were done by the abortion pill RU-486** [2], which is administered at 10 weeks or less. **44% of women who had abortions in 2020 had a previous abortion.** Because of this trend of women finding out earlier and earlier that they are pregnant and looking for a “quick fix,” we have prayerfully considered our response, which is three-fold.

**1** We have increased our targeted marketing towards the abortion-minded client so that we can minister life-affirming counsel. Through education and the power of the Holy Spirit we pray to end abortion in our lifetime and make it unthinkable.

**2** We have launched a telehealth center on November 15th where the women can speak to an RN. Our research shows that if a "compassionate medical connection" is made early then the woman will be more likely to choose life. Additionally, FCWS has 5 medical OBGYNs who oversee the medical aspects of this ministry.

**3** The Lord has brought us a bank building to purchase and renovate near UNF and FSCJ Southside so that we are the epicenter of our target age group, 18-24. These college-aged women may be far from family and it is important to be a life-affirming support system to these vulnerable women.
